SB01-NT

6" & 7" SIAM OAK BONGOS

The BONGO is a typical percussion used in the Cuban music. The most famous configuration is compsed by 2 bongos: the small one called "MACHO" produces higher frequencies and the big one, called "HEMBRA" is dedicated to reproduce the low frequncies. The TOGO series satisfies the needs of every percussionist thanks to the SIAM OAK shells as well as the Satin black COMFORT Rims. All the heads can be replaced with genuine SOUNDSATION heads.
