

SB01M-MH

6" & 7" MANGO BONGOS - SATIN NATURAL FINISH

The BONGO is a typical percussion used in the Cuban music. The most famous configuration is composed by 2 bongos: the small one called "MACHO" produces higher frequencies and the big one, called "HEMBRA" is dedicated to reproduce the low frequencies. The CARIBE series satisfies the needs of every percussionist thanks to the MANGO shells as well as the Satin black COMFORT Rims. All the heads can be replaced with genuine SOUNDSATION heads.
