SH-1000

# ANTI-REFLECTION/NOISE FILTER SCREEN FOR MICROPHONE

Precisely engineer the detail and clarity of your recordings with SOUNSATION's SH-1000 Microphone isolation shield. The SOUNDSATION SH-1000 isolating microphone screen allows you to make your own recordings with clarity and precision in the details.

The high density acoustic foam layer allows the microphone to "breathe" while dampening surrounding noise and limiting echoes and reflections. This creates cleaner, more focused audio. Two outer panels can easily be folded inward to create a tigther isolation chamber for detailed audio recording.

The screen can be easily mounted on a microphone stand or on its optional table base. Its lightweight alluminium frame and foldable design ensure that the isolation shield is portable and easy to transport.
