

WF-U300HP-A2

## 300-CHANNEL DUAL UHF COMPACT WIRELESS SYSTEM WITH 1 HAND MIC & 1 BODYPACK A2 (600-630MHZ)

The WF-U300 is a UHF dual wireless microphone system with 300 channels each. Its main characteristics are reliability, audio quality and extreme simplicity of use. It's been designed for all those professionals who need a ready-to-use tool, always.

Despite its minimalist look, the WF-U300 is a concentration of technology, capable of integrating a high-quality microphone preamp stage, a DSP-based audio processing, a PLL synthesis stage, and other functions in a single chip. Compared to analog systems, it significantly improves the stability and reliability of the FM modulation section, the AF and audio stages, offering professional level music performance.

The WF-U300 is also equipped with the IR synchronization system, for quick coupling between the receiver and transmitter. Both the hand transmitter and the pocket transmitter can work with AA alkaline or rechargeable batteries. The quality of the cardioid capsules of the handheld transmitter (dynamic) and of the headset (condenser) are professional.
