WF-U400 RACK KIT2

19” 2U RACK-MOUNT KIT FOR TWO WF-U402 AND/OR WF-U404 WIRELESS SYSTEMS

This kit contains everything required to mount two WF-U402 (2-channel) and/or WF-U404 (4-channel) wireless system receivers into a 19” 2U rack space. Since each receiver is equipped with two removable antennas, one of the two rack units is used to relocate the four antennas to the front panel of the rack, while the other rack unit houses the two receivers’ side-by-side.

The kit includes two short “L” brackets, a 19” blanking panel, coaxial cables and connectors for relocating the four receiver antennas to the front rack panel, mounting screws, and the brackets needed to join and secure the two receivers’ side-by-side.

WF-U400 RACK KIT2
