

QUARK 45

Micro tube head in Class D - 45W

Ultra light, ultra compact and powerful: QUARK 45 unleashes 45W RMS with its class D power amp and tube preamp featuring 12AX7 + FET technology. No harsh or artificial tones, just analog-enriched, dynamic and distinctive voice ranging from crystal clean to biting distortion: whatever you need for your licks and riffs is just one tweak away. QUARK 45 spots a remarkable arsenal of features for such a micro-sized machine: 2 channels, FX loop, Aux-In, Phone-Out, 2 speaker outputs, BT connection and analog VU-Meter for signal monitoring during studio recording. Great as back up head, sure, but incredibly performing during practice, rehearsals and recording sessions.
