YOUMIX Series

YOUMIX-202 MEDIA - 6-Channel Professional Mixer with Media Player, BT and Digital Multi Effect

YouMix series combines maximum portability with preamp quality, and filters and controls accuracy. The use of high quality SMD components allow us to concentrate functions that normally require much more space, such as the 60mm volume sliders, the SOLO function, a single display for both digital multi-effect and USB player, the BT connection. This series includes two models with 2 and 4 mic/line channels (plus 2 Line stereo inputs): YouMix-202 Media and YouMix-402 Media. They are ideal for live music, home recording, podcasting, and all those applications where you need to integrate all main functions of a professional mixing console into a single tool. ADX-800 LINK - Active 2-Channel DI-Box & Splitter

ADX-800 LINK is a DI-Box (Direct Injection Box) that converts up to two unbalanced audio signals (e.g. electric and / or acoustic guitars and basses, line signals such as guitar preamps, keyboards, multi-effects, computers, etc.) in balanced signals with XLR connections. This allows not only to attenuate the interferences that normally the unbalanced cables collect in the medium-long distances, but also acts as a splitter with a maximum of 3 outputs for Channel1 (2 XLR outputs + 1 balanced 1/4" TRS Jack). It can be powered either by the supplied power adapter, or through the +48V Phantom power coming from the mixer. It is equipped with a 3-position input attenuator (0dB, 20dB, 40dB) - to adapt the preamp stage to all types of signals - and the lift ground switch, very useful in case of ground loop. ADX-800 LINK is essentially an indispensable tool on stage, in the rehearsal room and recording studio to solve problems for musicians, DJs and sound engineers.

- 2 Channels DI-Box Operation
- 1 Channel Splitter function with max 3 Outputs
- TRS 1/4" Jack Outputs
- Balanced XLR Outputs
- 0/20/40dB Attenuation
- Operable via external Power Adapter (supplied) or external Phantom Power

AUDIO PROCESSORS

The Digital Audio Processors of DCX NET series (DCX-240 NET, DCX-260 NET, DCX- 480 NET) are powerful DSP based audio processors, ideally suited for install applications, where they combine the functions of a multitude of conventional products in a compact 1U unit with extensive remote control capabilities and Ethernet functions. To achieve this, the units have up to four inputs and eight outputs which can be configured in a selection of basic crossover modes – 4 x 2 way; 2 x 3 way + 2 Aux; 2 x 4 way; and 1 x 8 way (as applicable to i/o configurations). They also offer a “free assign” mode, which allows completely flexible routing of any output from any combination of inputs. Each input has a gain control, variable delay, eight bands of fully parametric equalization. The parametric filter bands have a large selection of different filter types available, including shelving, notch, band-pass, phase and elliptical behaviors. Each output has a gain control, variable delay, high and low pass crossover filters, 8 bands of fully parametric equalization, polarity switching and, additionally, a fully featured limiter, and a final clip limiter. The crossover filters offer slopes of up to 48dB/Octave, with a variety of responses available. Remote control is catered for in the form of Ethernet by TCP/IP and RS485 ports, and multiple user memories are provided for the storage and recall of settings.

DFE1224 - Digital Feedback Eliminator

The DFE-1224 is a feedback detection device that can be used in dual channel or mono mode. The feedback system analyzes all frequencies in the signal path, determines the cause of the Larsen effect and cancels it by implementing the 12 real-time high precision notch filters that have -45dB attenuation. The system is adjustable in 15 steps, allowing the user to change the DFE-1224 sensitivity to audio feedback according to your situation requirements. The parameter settings of the 12 notch filters per channel remain in RAM memory, but if it is required to keep them as a setting for future reference they must be saved in a user memory preset. If you switch off the DFE-1224 before saving any changed settings to a memory, these will be lost and on power up the unit will default to the last saved memory settings. The unit has 20 memories available, with 4 factory presets and 16 user memory presets. The DFE-1224 has a bypass system that has been designed within the analog domain and the unit can be connected via MIDI as well as USB for external control and two way movements of data.

SESTETTO 1012 SLIM SILENT - Indoor Slim PAR with 12 x 10W 6in1 LED no Fan

SOUNDSATION SESTETTO 1012 SLIM SILENT meets the needs of those professionals who need a powerful PAR for indoor applications, with 6IN1 LED technology, and suitable for quiet environments (such as theaters, conference rooms, or venues where noise has to be avoided as much as possible). The aluminum housing, able to dissipate the most of the heat produced by LED chips and circuitry, allows convection cooling and makes unnecessary the use of fans that, as silent they might be, however, can cause trouble in particular environments. The light source consists of 12 x 10W LEDs, selected for maximum durability and color emission. In total, they are capable of emitting 5800Lux at 2 meters (with all 6 colors at full). The 6IN1 technology enriches the color palette by adding, in addition to the classic R/G/B/W, amber, and ultra-violet, allowing you to create shades even more special. Finally, a special note deserves the attention to reliability and durability. The SESTETTO 1012 SLIM SILENT, in fact, adopts a new technology that adjusts the dimmer curve to the internal temperature. This, in addition to increase security, considerably lengthens LED chip lifespan.

- No fan indoor par light, which can provide you a perfect quiet environment

LIGHTBLASTER 102 COB - 2x100W Warm White + Cold White COB LED Blinder

Lightblaster LED blinders series combines the benefits of LED technology (energy saving, reliability and durability over time) with lighting requirements in the photographic, television and stage industry. The design is very essential and functional; the chassis is completely metal to facilitate the cooling of light sources. Programming and setting are extremely simple, and DMX512 allows these blinders to be remote controlled. All PARs are equipped with color temperature regulation system, which allows you to mix cold and warm white (3200 - 6500K) depending on your needs. The advanced cooling system reduces fan noise according to the internal temperature and allows them to be used even in situations where low noise is required. The advanced dimmer system provides various adjustment curves to fit the device to different requirements. Finally, the absence of flicker and dithering allows the use in television studios. The fixtures come with 100W COB LEDs (50W CW + 50W WW) with high brightness and durability.

For Orders for less than £500.00, FRENEXPORT shall charge Customer with the additional sum of £10.00 as administrative charges. The contract shall be deemed entered into between the Parties as of the date of receipt by Customer of the written Order Confirmation by FRENEXPORT.

Order Cancellations -In exceptional circumstances and solely at the discretion of FRENEXPORT, cancellations may be accepted. Verbal cancellations will only be valid if they are confirmed in writing by the customer and sent to FRENEXPORT by recorded delivery post, facsimile transmission or e-mail.

Special Orders in specific sizes and or finishes will be supplied by FRENEXPORT wherever possible, subject to an acceptance by the customs that the order cannot be cancelled, or the goods returned and all sizes and specifications are provided to FRENEXPORT by the customer in writing. In certain instances, and before acceptance of such special orders, FRENEXPORT will require a deposit of 50% of the total purchase price.

Documents - Price List: all information and data indicated in FRENEXPORT’s catalogues, leaflets, price lists and other informative documentation (hereinafter “Documentation”) shall be deemed purely indicative and may be subject to change at any time and prior to further notice. Customer is expressly forbidden to reproduce the Documentation by any means whatsoever and disclose its contents to any third party.

Delivery: Terms of delivery, where agreed, are purely indicative. Any delays in delivery shall not entitle Customer to termination of contract and to compensation for any direct or indirect damage, except in case of malice or gross negligence by FRENEXPORT, holding the obligation towards the client to pack the goods adequately and to protect them in such manner that they are able to reach the destination in good condition using standard transportation. The client is responsible for adequate transport insurance. Any covenant to the contrary is expressly excluded. Customer may in no event and on no account delay, suspend or omit any payments due. Any claim or title Customer may have shall be enforced by a separate action, it being expressly understood that Customer shall not be entitled to set off any sums due by the same against any of its credits or claims.

- The promised guarantees are not provided.

Where Customer has several debts to FRENEXPORT, the latter may decide from time to time to which debt any payment by Customer is to be allocated.

Customer will store the goods supplied by FRENEXPORT in a way which makes them clearly identifiable as FRENEXPORT’s property or maintains records of goods owned by FRENEXPORT and shall identify them to FRENEXPORT on demand. Failing such identification, all goods supplied by FRENEXPORT in Customer’s possession shall be deemed to belong to FRENEXPORT. Any products of identical type supplied by the FRENEXPORT to Customer over a period of time and on a number of different invoices, any stock remaining unsold at any time will be taken as relating to that supplied on the most recent invoice(s).
